Mini Circular Connectors

Miniature D Series Connector for Medical Applications

When failure is not an option.

small Connector, High Reliability

With significant industry trends toward product miniaturization and product integration, manufacturers continue to create more sophisticated products with higher levels of data acquisition and signal processing.

Hypertronics new “mini” connector is designed to be both rugged and versatile in order to meet the increased functionality requirements for today’s more advanced systems.

The next generation miniature connector is designed to reduce size by nearly 30 percent while providing maximum signal reliability. The mini connector is a product extension of the popular push-button D Series circular connector line.

The D00 mini connector incorporates ultrareliable Hypertac hyperboloid contacts with Ø0.30mm pins which create a significantly smaller form factor with five-signal contacts rated at 1 Amp each. The design maintains the all same reliable electromechanical performance characteristics of all Hypertac contacts: high cycle life, low contact resistance, low insertion and extraction force, resistance to shock and vibration, and superior self-cleaning action, but now meet the industry’s increased demands for miniaturization and higher density.

The easy-to-assemble mini D Series incorporates the familiar push-button latch for simple operation with alignment and polarization provided by the distinctive housing design. Crimp / solder terminations accommodate up to 24 AWG wire. The receptacle has 6-inch [15.24mm] pigtails and is available with optional custom lengths and board terminations.

The mini D Series connector is ideal for use in medical equipment such as monitors, therapeutic devices, imaging applications, and invasive probes. With medical systems becoming smaller, Hypertronics mini connectors allow manufacturers to create smaller devices that offer more comfort and portability for patients.
Mini Circular Connectors

Features

- Hypertac high reliability contacts
- 1 Amp rating per contact
- High cycle life
- Self-cleaning contacts
- Low mating forces
- Simple, easy to use latching mechanisms
- Available with custom overmolding and cable assemblies
- Crimp / solder contact terminations
- Value Add Option: Receptacles with 6-inch wire leads

Hypertac® Contact System

- Wire sleeve before insertion of pin
- Pin partially inserted into sleeve
- Pin completely inserted into sleeve
